### DETAILED ACTION

Applicant's arguments have been fully considered but they are not persuasive. The claims remain rejected for the reasons of record. The applicant has argued that the prior art does not provide the motivation to make the claim designated cell line, however the prior art does provide a stat null allele animal and the motivation and technique for making cell lines from a transgenic animal. The references render obvious the claimed invention.

Arguments that the deposited cell line is unobvious will be entertained after final.

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-5 & 35-37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Durbin et al in view of Jallat et al(A) and Leder et al (B) and also in view of Todaro et al(as cited in applicant's specification).

Durbin teaches the production of STAT1 null allele transgenic mice but does not teach developing a cell line from the mice. It would have been obvious to one of ordinary skill in the art at the time the invention was made to make a cell line from the cells of the transgenic mice of

Art Unit: 1651

Durbin because Leder and Jallat motivate the artisan to do that and disclose how to make cell lines from transgenic mice. Additionally, the immortalization of said cell lines would have been obvious at the time the invention was made because the immortalization of cells and the desirabilities of immortalization using such tools as SV40 is notoriously old and well known in the art.

3. Accordingly, the claimed invention was prima facie obvious to one of ordinary skill in the art at the time the invention was made especially in the absence of evidence to the contrary.

#### ***Conclusion***

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
